

Application: PowerPoint - Lines and Connectors

Lines connect shapes together and will move with the shapes they are connected to provide they are connected to the shape.

1. Select the required line or arrow from the **Insert > Shapes** button.
2. Hover over the first shape you want to connect and place the cursor in one of the resize handles (grey circles).
3. Click and drag to the resize handle of second shape you want to connect to and then let go of the mouse.
4. Notice the green circle on both shapes, indicating the shapes are connected.
