

Application: Word – Navigation Pane – Pages

The Navigation Pane - Pages option allows you to navigate through the document using pages.

1. **Select View** tab > **Show** group and check **Navigation Pane**, or press **CTRL+F**.

2. Click on **Pages**. This will display thumbnails of the pages in your document.
3. Click on any page in your document to navigate to it.

4. Use the **scroll bars** to display more pages in the document.

Tip: Word highlights the page you're on in the Navigation pane to show you where you are.

5. When you have finished using the Navigation Pane close it using the cross at top right-hand side.
